

Cherokee Nation STEM Camp, June 8-20 2008

Cherokee Nation is pleased to announce the first Cherokee Nation STEM (Science, Technology, Engineering, and Mathematics) Camp to be held on Sequoyah Schools' campus from Sunday, June 8 through Friday, June 20, 2008.

The Cherokee Nation STEM Camp is an opportunity for Cherokee students to actively participate in a science-based learning environment through hands-on learning projects. Two exciting classes will be offered: The Robotic Project, a Vex Robotic Class taught by Dr. Calvin Cole and The Long Men Project, a Native Science Class taught by Dr. Paul Shigman.

The Cherokee Nation STEM Camp will be open to 9th - 12th grade Cherokee students who attend schools in the Cherokee Nation service area. It is a residential camp, meaning that students will stay in the dormitories on the Sequoyah Schools' campus and all meals will be provided. For more information, contact Daniel Faddis by [email](mailto:dfaddis@cherokee-nsn.gov) or by phone at (918) 453-5224.
